

DID YOU KNOW?

WHY DID COLORADANS BRING FORWARD THREE **PROTECT KIDS** BALLOT MEASURES?

These measures didn't come out of nowhere. Each addresses a different gap in protecting children in Colorado.

VOTE YES ON 133 TO PROTECT CHILDREN FROM CHILD SEX TRAFFICKING

READ THE MEASURE

Colorado may have some of the weakest laws against child sex trafficking. The average age a Colorado child is first sold for sex is just 14. Think about the 14-year-olds in your life: your child, grandchild, niece, nephew, or a friend's child. Picture their faces. If someone bought or sold them for sex, what punishment would you believe fit the crime? By voting YES on this measure, we can better protect Colorado children by making child sex trafficking offenses punishable by life in prison without parole—because someone who knowingly buys or sells a child for sex should never get the opportunity to victimize another child.

THE PEOPLE'S SOLUTION → CHILDREN ARE NOT FOR SALE

VOTE YES ON 134 TO PROTECT GIRLS' SPORTS FOR FEMALE ATHLETES

READ THE MEASURE

Girls deserve sports that are fair and safe. Biological differences between males and females matter in athletic competition, which is why girls' sports were created in the first place. When males compete on designated girls' teams, girls can lose opportunities to compete, win, earn recognition, and feel secure in female locker rooms and other private spaces. If we want girls to stay in sports, shouldn't we protect the fairness, safety, privacy, and opportunities those teams were created to provide? By voting YES on this measure, Colorado sports would be designated Male, Female, or Co-Ed based on biological sex—protecting girls' athletics while preserving opportunities for everyone to participate.

THE PEOPLE'S SOLUTION → FAIRNESS, SAFETY, OPPORTUNITY

VOTE YES ON 135 TO PROTECT CHILDREN FROM IRREVERSIBLE CHILD SEX CHANGE SURGERY

Irreversible child sex change surgeries are being performed on Colorado children, some as young as age 12, and often at taxpayer expense. We set age restrictions on voting, and drinking, and smoking. Shouldn't a decision that can permanently change a child's body and reproductive future wait too? By voting YES on this measure, we protect children age 17 and younger from elective, irreversible sex-change surgeries and prohibit taxpayer dollars from paying for them.

THE PEOPLE'S SOLUTION → PREVENT HARM. PRESERVE FUTURES.

HOW DID COLORADO GET HERE?

Over several years Colorado legislators enacted laws affecting parental rights, schools, mental health care, gender identity, medical treatment, public funding, insurance, and other decisions involving children.
